AMENDMENTS TO THE CLAIMS

1. - 4. (Cancelled)

5. (Currently Amended) A method for treating an individual with a mood-disorder

having at least symptoms of feelings of guilt, suicide, and retardation: psychomotor, associated

with a mood disorder, each symptom being assessed according to the assessment method by the

Hamilton scale, comprising

administering an effective amount of a composition comprising theanine to the individual

with the mood disorder in need of treatment,

wherein said mood disorder is distinct from mood disorders associated with

menstruation; and

wherein said individual is a normofolatemic patient.

6. (Cancelled)

7. (Previously Presented) The method of claim 5, wherein said composition is

administered as a food or beverage.

8-12. (Cancelled)

13. (Previously Presented) The method of claim 5, wherein said normofolatemic patient

shows a normal folate plasma level of from 3 to 17 ng/ml.
